All Points North - **APN**

Use this to orientate the map (and yourself). This is great technique to use when you arrive at a new location, want to check or tidy up your map orientation to surrounding features, it is dark, you are lost and want to do something positive, and after lunch!

---

**a** Turn the compass housing so the **N** lines up with the direction of travel arrow.

**b** Line the direction of travel (or edge of compass) with the map north ‘lines’ (top of the map).

**c** Rotate the map until the **red** magnetic arrow lines up the the housing **north** ‘painted north’ and the **north** map lines - **ALL POINTS NORTH**.
